

Suretyship

Our lawyers are some of the most experienced surety attorneys in the nation. With a total of more than 80 years of combined suretyship representation, they offer a full range of services to the industry. The Firm represents most of the premier sureties in the country and has engaged in international representation when requested. The services provided range from simple advice on payment and performance bond claims to complex financing, takeover and tender problems on large projects. We regularly assist our surety clients with pursuit of their indemnity rights and pride ourselves on useful, efficient and practical advice in these situations.

Frequently, our representation of sureties requires litigation of technical construction issues. Our attorneys have developed considerable expertise with such matters that allows us to effectively advocate and resolve disputes.
